

HOW TO SELECT PRODUCTS WITH THIS GUIDE:

(This GUIDE is available on our Catalog/Guide downloads page: <http://www.repdesign.us/Download3.html>)

- (1) Look at the "types of antennas" column that describes your antenna, then look at the "where used" column. "YES" means the product is compatible with your antenna and use.
- (2) Look at the "model number" and "description" columns for products that are compatible with your needs. The "pcp" column indicates if powder coating is available.
- (3) The "required" column indicates if there are specific application requirements; the "options" column shows other products which may be useful (but are not required).
- (4) CONTACT US IF YOU HAVE QUESTIONS - we're here to help and provide EXCELLENT customer service! REALLY!

ANTENNA TYPE CATEGORIES USED IN CHART ABOVE

==> if your antenna type is not listed, or if you are not sure, PLEASE CONTACT US by phone or email <==

- [A-1] VHF-UHF & GMRS mobile antennas** - essentially any size 6m (50 MHz) and higher frequency mobile antenna, including the UHF GMRS band and VHF-UHF commercial bands, that can mount to an NMO, SO239 or 3/8x24 stud base. Our NMO groundplane base is designed for 135 - 512 MHz use.
- [A-2] Small HF & 11m CB mobile antennas** - "ham stick" type, Hustler type loading coil, Outbacker type "wonder lead", "Texas Bugcatcher" type, manually tunable (Super Antennas MP1, MFJ-1624, etc.), smaller screwdriver (ATAS-100/120, High Sierra "Sidekick", Tarheel "Little Tarheel", Super Antennas MP2, etc.), standard CB (11m) and other similar sized mobile antennas that screw into a 3/8x24, NMO or SO239 base.
- [A-3] Medium HF mobile (antenna base diameter up to 2 inches)**: screwdriver HF (High Sierra HS1500 & HS1800, Tarheel full sized, etc.), motorized (Hi Q Antennas "2 through 5 series" (EXCEPT military "ruggedized" 5-6 series which are 2.5" diameter) and other similar sized mobile antennas that mount with a standard 3/8x24 stud, into a 3/4" diameter hole. Some of these require two points of support for mobile use.
- [A-4] Large HF mobile (antenna base diameter up to 2.5 inches)** - motorized HF (Hi Q Antennas "ruggedized" 5 & 6 series military versions such as 5/160, 6/160, etc.) and other similar size antennas with a base diameter up to 2.5 inches that can be mounted into a 3/4" hole with or without insulating washers & **NOT** need a 2nd point of attachment.
- [A-5] Ex. Large HF mobile (antenna base diameter 3 - 4 inches)** - screwdriver HF (Scorpion Antennas, etc.) with a base diameter of 3 - 4 inches and that mount into a 3/4" hole and do **NOT** need a second point of attachment.
- [A-6] Special Applications - Masts and flag poles** with O.D. 1-2 inches (Buddipole™ mast system & light weight telescoping masts with small beam or wire dipole antenna or small HF antenna, and flag poles or any other pole). Also **Shakespeare 4245 military spring base applications** (for Shakespeare 16 and 32 ft. vertical whips and Hi Q Antennas ruggedized "5 & 6 series" that fit the same spring base; hardware kit to mount certain SGC auto tuners below spring). Also **computer WiFi panel type antennas** (we can provide cable and high power USB adapter by special order - same one we use while traveling). NEW: **Buddipole™** & **BuddiStick™** antennas with "VersaBase" antenna base. **BuddiStick™** also fits our 3/8x24 stud base. **WiFi Kit** for CLAMP-150 for U-bolt mounted outside gain WiFi antennas.
